COMMERCIAL

—

Keyless smart access for enhanced 24/7 security, safety and streamlined management.

Smart solutions for more secure enterprises, factories, transport and public spaces.

—

Increase security and safety for people and property. SALTO delivers the most convenient, flexible and secure access control solutions for all types of commercial property - Offices, Manufacturing, Industrial sites, Airports, Transportation Infrastructures, Government & Public Sector and many more.
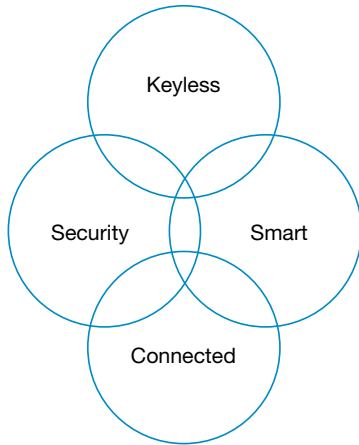

Access control solutions for Commercial

In today's world, security is increasingly a priority for owners, users and visitors of industrial, public office, commercial and infrastructure facilities. Modern access systems must be up to the demands posed by significant numbers of people coming in and out of these facilities - sometimes 24/7 - all qualifying for different levels of access – employees, staff, visitors, suppliers, delivery people, and clients.

Keyless smart access for enhanced 24/7 security, safety and streamlined management.

One-size-fits-all physical key systems are no longer fit for purpose. Site owners and operators, and the people who work in or visit those sites, need much higher levels of control and reassurance.

SALTO electronic access control systems are the 21st century solution. We combine high levels of wide area security - fine tuned to an individual level - with flexibility, management simplicity and process and cost optimization for businesses of all types and sizes.

Focus Areas

—

Keyless

Security   Smart

Connected

Avoid expensive cabling with wire-free security technology to secure any access point.

Eliminate mechanical keys, simplify operations with precise, automated access permission.

Increase visibility with 24/7 real-time monitoring and management.

Balance security and convenience, manage access to multiple sites on a single, flexible platform.

Security & Safety

Improve safety and security for staff, users and visitors, gain 24/7 activity oversight.

Peace of mind.

Physical keys are easily lost or copied and expensive to replace. Smart access is safer, more secure and simpler to manage.

Full control.

Protect your perimeter and any building access point. Specify down to individual level who can access what, and when, in real-time; grant time-controlled access to staff or delivery services remotely.
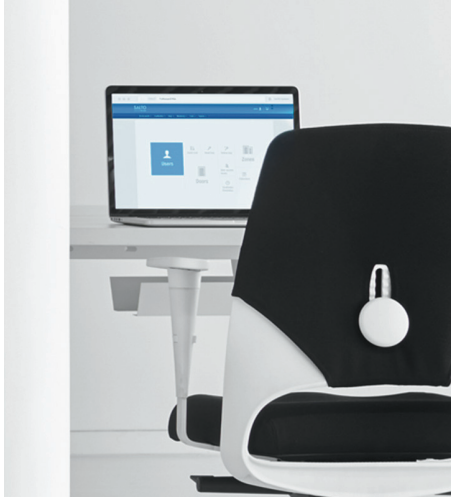

Intrusion detection.

Receive reports on access activity. Be alerted to after hours access and intruders on site. Protect against theft, vandalism, sabotage or industrial espionage.

Responsiveness.

Adjust access permissions and schedules on the spot, revoke terminated employees or tenants immediately, maintain security at all times.

Operational Efficiency

Get 360-degree access control across your building or site and optimize security processes. Reduce operating costs with no more physical keys to purchase, locks replace and save resources through more efficient access administration

Simplicity.

Flexible, secure, and inexpensive access control using smartphones (iOS or Android), keycards, fobs or PINs. Reduce admin and save on rekeying when users leave or lose keys.

Centralization.

Access rules based on role or user profiles allow you to provide privileged access to any door remotely and in real-time. Control all access points and perimeters in one integrated platform, accessible from any browser. Manage multiple locations/ buildings to maximize ROI.

Automation.

Automate repetitive daily functions and incident responses to save time, improve maintenance planning and reduce on-site staff requirements. Operate 24/7.

Integration.

SALTO access control integrates with the business technology ecosystem including management and security software (BMS) and other third-party systems. Also integrates with other security systems such as alarm and video.

Better visibility.

Get detailed real-time data to manage people counting to track the number of users entering and leaving an area and analyze movement flows. Create audit trails to help improve site security and safety.

User Experience

Deliver seamless access for staff and better experiences for users and visitors with efficient, secure and flexible SALTO smart access technology.

Smart-tech convenience.

Help staff, users or visitors come and go more easily. Replace the hassle of physical keys with advanced SALTO smart-technology access options using smartphones (iOS or Android), smart keycards, or PIN codes.

Smart access.

Support long-serving or highly-skilled staff with the flexibility to tailor individual access to perimetral doors or sensitive areas like warehouse, back offices, and server rooms. Revoke access privileges remotely, in real-time.

Instant onboarding.

Resolve issues on the spot. Get new staff or visitors onboard faster and more easily – even send their access solution in advance.

Visitor control.

Easy add/delete functionality makes it practical to extend access control beyond regular staff to casual visitors/ drop-ins. Track where they go and for how long within your site.

Simplified Management

Our cloud or on-premise hosting solutions give flexibility and scalability to expand your access control infrastructure, and easily add new sites anywhere in the world.

Built to work on every door.

SALTO solutions work with any door including emergency exits, wooden and metal doors, elevators and parking garages. Our hardware and technology platform can be added to doors with existing locks without additional modifications or wiring.
Low-cost installation. Installations completed in hours, not days or weeks, saving time and money.

Future-proof.

Modular design and future-proof engineering accommodate growth or regulatory changes to ensure continued compliance.

Seamless integration.

Integrates with building systems, security systems and property management software platforms including intrusion detection, CCTV & video surveillance, fire alarm, HVAC, and BMS platforms.

Full support.

A global network of trained and certified installers ensures support is always available.

SALTO Systems

Our People

1,200 professional team members who – with their work, passion, and talent – contribute to the creation of innovative technologies and solutions.

210 professionals dedicated to the engineering design and development of new technologies applied to access control and infrastructure management.

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001.

For 20 years SALTO has been synonymous with innovative solutions – including stand-alone, cloud-based and mobile applications – that set new standards in security, manageability, flexibility, and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

Our Figures

SALTO Systems aims to have a leading role in the unstoppable process of the massive replacement of mechanical keys with electronic keys. This commitment has positioned us as one of the top three leading manufacturers of electronic locks worldwide.

Our goal is to develop products and new technologies that adapt to the continuously-changing needs of each vertical market through reliable solutions that are easy to install, use, and maintain.

5,700,000 equipped access points.

More than **40,000 projects** spread all over the world.

40 offices and a global international structure with 28 subsidiaries.

40,000,000 users – from all over the world – use our technology daily to access their place of work, building, school, or home.
