

EDUCATION

SALTO is the global leader in next-generation access control solutions for schools, colleges and universities.

Meeting the security challenges of Education today.

Manage and control educational environments better. Balance security with accessibility, and advanced technology with affordability. SALTO wire-free, smart tech access solutions are supporting safe, welcoming campuses in educational facilities and institutions globally to protect our children, teachers, and community in their places of learning.

Smart access control solutions for Education

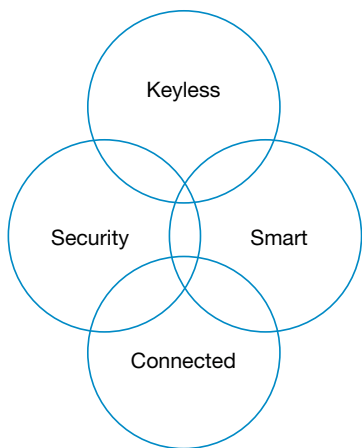

Security is a top priority for educators in today's world. Parents need to know that students are safe while teachers and staff need safety reassurance to do their jobs. By balancing security with accessibility and advanced technology with affordability, SALTO delivers access control applications that exceed the needs of educational facilities and institutions around the world.

SALTO is the global leader in next-generation access control solutions for schools, colleges and universities.

The challenge is delivering robust protection for a variety of scenarios while maintaining a welcoming learning environment. This must be achieved across a range of physical locations, often simultaneously – buildings, classrooms, libraries, labs, staff rooms, sports and cultural facilities, canteens and cafeterias.

From kindergartens to universities, high schools and colleges to research and development institutes, SALTO educational access solutions are delivering lower costs, greater flexibility and critically, peace of mind.

Focus Areas

New levels of flexibility, accessibility, security and improved access control.

Emergency readiness with lockdown functionality and AMOK function mode.

Fits any door, any access point with a complete hardware and electronic locking platform.

Smart access, smartphone and student smart card compatibility eliminates the risks and costs of lost keys.

Security & Safety

1 — 4

Access control plays one of the most critical roles in protecting people in educational environments. Secure and control every door and ensure peace of mind for everyone, from students and staff to parents and visitors.

Provide reassurance.

Control precisely who can enter, when, and where they can go —classrooms, residences, labs, gyms, common areas, etc. Cancel access immediately on notice of loss.

Emergency preparedness.

Enable localized lockdowns activated by staff on the ground in emergencies, and immediately lock down specific doors, buildings or entire campuses. SALTO AMOK electronic smart locks models have a built-in card reader on the inside of the lock that enables staff smart keycards to activate the lockdown function mode in order to lock down a room quickly. Only authorized users with AMOK privileges on their access plan can activate it.

Crisis responsiveness.

Configure customized responses for multiple crisis levels. Enable area-specific protocols for emergency lockdowns or openings.

Convenience.

Meet student, staff and visitor security needs across the campus with one single student card, smartphone app or keyfob, increasing staff and guest security and peace of mind. Avoid having to replace, maintain, label and safely store multiple keys.

Easily add safety integrations.

SALTO integrates with existing CCTV, alarm monitoring and other building management and security systems, delivering centralized control on one platform.

Flexibility & Scalability

2 — 4

Look to the future with an access solution that will support growth both in physical locations and staff/student services.

SALTO's future-proof engineering and design, durability, scalability, and flexibility allow you to easily integrate your access control solution with other campus services like cashless vending, meal plans, printing, library systems, transportation services, and more—all on one credential.

Future-proof.

Flexible technology ensures your electronic locking infrastructure complies with the latest regulations, and is easily scalable.

Easy installation, low maintenance.

Advanced SALTO solutions work on any door, however unusual or non-standard. They convert any door into a fully-featured smart door, equipped to comply with local regulations for safe and healthy environments.

Centralized control.

Smart technology links each door lock with a central control database while enabling specified degrees of local flexibility to change access privileges in real-time.

Seamless integration.

Compatible with any existing SQL-based campus systems with LAN/WAN capabilities, SALTO solutions support your emergency action plans, daily security activities and ensure that building operations capabilities are maximized.

Full support.

Our worldwide network of trained and certified installers ensures support is always available.

Student & Staff Experience

3 — 4

Keyless and mobile technology to provide your staff and students a safer, healthier, and more convenient experience. Minimize admin distractions for staff and students to help them get on with the central task of learning.

Mobile and smart card technology enable you to integrate student and staff physical security needs into a single card or digital credential on a smartphone – providing the most convenient and secure access for them and more control for you.

Smart-tech convenience.

Deliver access via the technology staff and students use daily — their smartphones or student card.

Campus-wide functionality.

Integrate SALTO with student cards and campus facilities for a seamless experience that can include building/room access, vending machine and canteen payments, library systems, printing and transportation, and more.

Remote and real-time control.

Support staff, students and visitors with the ability to instantly grant access to resources and facilities even out of hours — for example, in evenings or on weekends — with or without on-premise staff.

Personalization.

Create specific access plans for specific locations to facilitate one-off conferences, sports and cultural events. Avoid key-sharing, maintain control.

Simplified Management

Streamline campus access management to reduce costs and increase flexibility while delivering improved security and safety for staff, students and visitors.

SALTO's robust access control management platform allows administrators to differentiate easily who has access and when to different places such as classrooms, offices, libraries, residences, laboratories, athletic areas, cultural facilities, and common areas.

Cost savings.

Eliminate the time and expense associated with lost and stolen keys. Make it easy to perform routine tasks, such as issuing or editing user authorizations.

Centralization.

Manage access across multiple sites and locations in real-time from one location.

Greater flexibility.

Program access times, zones and access points for students, staff, and visitors. Edit access privileges, including durations in real-time, for visitors and short-term guests, contract and temporary workers, as well as staff and students.

Gain efficiency and control.

Capture valuable data on room and facility usage to maximize utilization and improve traffic flows. Live event access to audit trail data in real-time is easy and more intuitive with web-based software.

Secure and easy management.

Intuitive software interface and powerful software makes it easy to change access plans, facilitating the individual programming of certain installations for conferences, sports and cultural events.

Crisis management.

Send mass emails or texts to emergency notification lists, and communicate easily with people on the ground.

SALTO Systems

Our People

1,200 professional team members who – with their work, passion, and talent – contribute to the creation of innovative technologies and solutions.

210 professionals dedicated to the engineering design and development of new technologies applied to access control and infrastructure management.

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001.

For 20 years SALTO has been synonymous with innovative solutions – including stand-alone, cloud-based and mobile applications – that set new standards in security, manageability, flexibility, and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

Our Figures

SALTO Systems aims to have a leading role in the unstoppable process of the massive replacement of mechanical keys with electronic keys. This commitment has positioned us as one of the top three leading manufacturers of electronic locks worldwide.

Our goal is to develop products and new technologies that adapt to the continuously-changing needs of each vertical market through reliable solutions that are easy to install, use, and maintain.

5,700,000 equipped access points.

More than **40,000 projects** spread all over the world.

40 offices and a global international structure with 28 subsidiaries.

40,000,000 users – from all over the world – use our technology daily to access their place of work, building, school, or home.
