

HEALTHCARE

Meeting the unique security challenges of healthcare.

**Advanced access control for today's
Healthcare facilities.**

Deliver convenient, secure, hygienic keyless access across the most complex healthcare sites. Combine control with flexibility to keep pace with fast-changing staff and patient needs.

Smart access control solutions for Healthcare

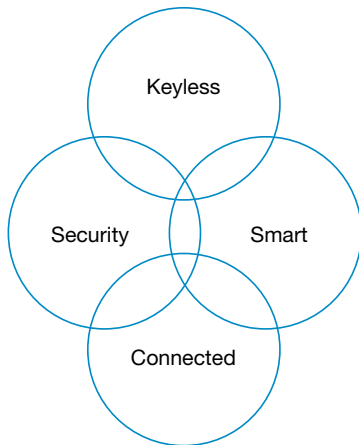

Healthcare facilities present unique access challenges. While they must offer a welcoming environment - often 24/7 - for a constantly changing user base, back-of-house and staff-only areas need tight control to protect patients, staff, volunteers, visitors and suppliers.

Meeting the unique security challenges of healthcare.

Specific areas - operating theatres, consulting rooms, pharmacies, laboratories, drug cabinets, surgical wards – all have different security and accessibility needs. As well as doors, lockers, cabinets, carts and special medical equipment all need access control.

SALTO smart access solutions combine the security, protection and flexibility that healthcare facilities need, and our BioCote® antimicrobial silver ion technology in construction contributes to a more hygienic environment.

Focus Areas

Simplified security and access management to multiple sites on a single platform.

Emergency readiness with lockdown and real-time opening functionalities.

Eliminates lost/duplicate key problems and improves record-keeping.

Hygienic no-touch, keyless access with antimicrobial surfaces.

Safety & Protection

1 — 4

Enable improved safety and protection for patients, visitors and staff in welcoming, frictionless environments with SALTO smart access technology. Decide who goes where and when and prevent unauthorized accesses to restricted areas.

Smart control.

Provide staff with convenient, keyless access. Link user profiles and working calendars to specific areas or practice zones. Instantly set and modify access credentials to ensure a secure environment.

Visitor visibility.

Give visitors temporary credentials with photographs for improved security.

Granular-level control.

Give key employees 24/7 access while limiting common area access hours, securing sensitive areas such as maternity wards and intensive care units, protecting assets and data, and securing supplies.

Contagion control.

Restrict and control access to contagious disease areas. Manage critical patient movement flows and track contagion chains.

Microbe protection.

Provide a cleaner, safer, and more hygienic environment for staff, visitors, and patients. BioCote® antimicrobial silver ion finishes help eliminate up to 99.99% of microbes on access surfaces.

Streamlined Operations

Simplify and automate access management with a seamless and integrated control solution that improves operations and employee experience. Maintain security and support the smooth running of critical functions regardless of traffic volumes.

Centralized security management.

Enable 24/7 security management within or across sites by consolidating it in one location. Ensure consistent application of access protocols.

More efficiency.

Simplify access management and issuing authorizations, eliminate time consuming lost-key issues.

Greater flexibility.

Easily create role-specific access to cater to the diversity of healthcare employees and their working requirements.

Improved reporting.

Monitor compliance, generate audit trails, access activity insights to improve procedures.

Automate daily functions.

Automate repetitive tasks such as lock/unlock scheduling for access to common areas and maintenance planning. Simplify pharmacy inventory management and enhance protection.

Flexibility & Scalability

3 — 4

Enjoy flexibility to expand your electronic locking infrastructure across new facilities and sites.

It's easy to add additional properties – nearby or in a global expansion. SALTO's access control expertise and hardware works with any door in the world, however unusual the door may be.

Built to work on every door.

SALTO works on any door, cabinet or access point - however unusual. A wide choice of designs and finishes ensure a look that is always appropriate to your space.

Easier onboarding.

Quickly add, delete or modify access permissions as the workforce grows and changes. Speed up new starter onboarding, manage departures or role changes.

Full integration with your software.

SALTO solutions integrate seamlessly with existing management and security systems such as video surveillance and alarm and satellite locations to help you keep security infrastructure simple, affordable or even portable.

Full support.

A global network of trained and certified installers ensures support to maintain and expand your security operations, when and where you need it.

Security & Convenience

Improve safety for patients, visitors and staff, secure expensive medical equipment and assets, and protect data with convenient keyless, contactless SALTO keyless smart access control.

Electronic locks are safer and easier to manage than mechanical keys, which is especially important in a medical environment where security is essential.

Seamless access.

Meet all staff security and access needs with the same smartphone (iOS or Android), keycard, smart fob, wristband or PIN access.

Intelligent control.

Full control in real-time of who can access what, when, and where; grant role-appropriate access to visitors, employees, volunteers and delivery services.

Emergency preparedness.

Immediately lock down specific doors, buildings or entire sites in the event of an attempted unauthorized entry or emergency incident. Monitor emergencies in real-time and enable localized lockdowns activated by staff on the ground.

Storage security.

Enable added protection for medical files, pharmacy and controlled substances with electronic, access-controlled locker systems. Ensure audit trails in case of a breach.

Easily add safety integrations.

SALTO integrates with existing CCTV, POS, alarm monitoring, fire and other building/ personnel management and security systems, delivering centralized control on one platform.

SALTO Systems

Our People

1,200 professional team members who – with their work, passion, and talent – contribute to the creation of innovative technologies and solutions.

210 professionals dedicated to the engineering design and development of new technologies applied to access control and infrastructure management.

SALTO Systems revolutionised access control with the introduction of the SALTO Virtual Network SVN data-on-card technology and the advanced battery-operated wireless electronic smart door lock range in 2001.

For 20 years SALTO has been synonymous with innovative solutions – including stand-alone, cloud-based and mobile applications – that set new standards in security, manageability, flexibility, and design that bring real-world benefits to virtually any door and building type. Across a broad range of industries and applications, SALTO is widely recognised as a global market leader in smart electronic access control solutions.

Our Figures

SALTO Systems aims to have a leading role in the unstoppable process of the massive replacement of mechanical keys with electronic keys. This commitment has positioned us as one of the top three leading manufacturers of electronic locks worldwide.

Our goal is to develop products and new technologies that adapt to the continuously-changing needs of each vertical market through reliable solutions that are easy to install, use, and maintain.

5,700,000 equipped access points.

More than **40,000 projects** spread all over the world.

40 offices and a global international structure with 28 subsidiaries.

40,000,000 users – from all over the world – use our technology daily to access their place of work, building, school, or home.
